Sneak Peak: C9 Corvette

Yes, a C9 Corvette is coming, expected to debut as a 2029 model, and will likely blend internal combustion engines (ICE) with hybrid options, building on the mid-engine C8 platform with significant design changes, potentially incorporating elements from futuristic concepts GM is currently exploring. While a fully electric Corvette may follow later, the C9's initial release will probably feature updated V8s and hybrid powertrains for a blend of tradition and modern performance.

Sneak Peak: C9 Corvette

Key Expectations for the C9 Corvette:

- Debut: Expected for the 2029 model year, with reveal likely in 2028.
- Platform: Will likely use a modified version of the current C8's Y2 platform.
- Powertrain: Expect updated V8 engines (like the LT2/LT6) and hybrid options, similar to the E-Ray, but with more focus on hybridization.
- Design: A significant shift from the C8, with concepts showing more exotic, aggressive, and aerodynamic styling, potentially with features like active aerodynamics.
- Evolution: GM's design studios are exploring concepts to influence the C9, driving towards a more exotic and technologically advanced future for the Corvette brand.
